KDC350 Barcode Data Collector

A New Wave in Auto-ID

The KDC350 enables diverse mobile Auto-Identification applications for collecting and storing barcode data.

A built-in display and keypad eliminate blind erroneous data collection and enable interactive data collection processes.

An easy-to-replace rechargeable battery that can recharge from any USB port allows more than 25,000,000 barcode scans. With 4MB of on-board memory that stores over 100,000 product databases, memory shortages are also no longer a problem.

All KDC products come with FREE KTSync® software (includes keyboard wedging, application generation, DB look up and inventory management features) and FREE SDK (includes technical support from our top engineers and development staff).
